

CCF Test Plan Release Version 11.0.0
CCF Test Plan Database Launch

Test Plan Release...

The CDMA Certification Forum™ (CCF) has released version 11.0.0 of the CCF test plan. This is a significant milestone within the CCF as release of this test plan coincides with formal launch of the CCF Test Plan Database (TPDB). Version 11.0.0 and all future CCF Test Plan releases will utilize the CCF Test Plan Database for generation of device specific test plans.

Test Plan Database...

Information for obtaining access to the CCF Test Plan Database may be found in Appendix A of the CCF Test Plan, version 11.0.0.

The CCF Test Plan Database enables device specific test plan generation and facilitates ongoing CCF test plan maintenance. Device Vendors may now specify the features and functions of a device through on-line modification of the Device Definition Table (DDT). The Vendor will use this DDT to generate a device specific test plan for use by the Authorized Testing Facility that will perform CCF Certification Testing for the device.

With release of CCF Test Plan version 11.0.0, Appendix A of the CCF test plan, formerly an Excel spreadsheet enumerating all test cases within the CCF test plan, will refer directly to the CCF Test Plan as implemented by the CCF Test Plan Database (TPDB). The *Appendix A* Excel spreadsheet will no longer be released with the test plan. Under the *120-Day Rule*, Version 10.1.0 of the CCF Test Plan will expire at UTC/GMT Friday, 8 October 2010 at 00:00 hours (midnight). At the end of this 120-day grace period the Excel spreadsheet containing the test plan test cases will be archived.

Accessing the Test Plan Database...

Test Plan Version 11.0.0 Appendix A provides information for accessing the CCF Test Plan Database

GlobalCCF Links have been placed on the www.GlobalCCF.org website within the *CERTIFICATION* drop down menu.

The screenshot shows the CDMA Certification Forum website. The navigation menu includes: HOME, CONTACT US, BECOME A MEMBER, SIGN IN, FORGOT YOUR PASSWORD, SEARCH, ABOUT US, CERTIFICATION, MEMBERSHIP, TEST FACILITIES, NEWS & WEB STORE. The 'CERTIFICATION' dropdown menu is open, listing: Certification Process, CCF Certification Database, CCF Certification Process Guide, CCF Test Plan version 10.1.0, CCF Test Plan Database (highlighted), Why Get Your Device Certified?, Certified Devices, Fee Structure, Frequently Asked Questions, and Video Training. A 'News' section on the left mentions a 'Just released!' article about the importance of device testing at the CDMA World Forum. A 'Register Today!' banner on the right promotes a meeting on July 13-14, 2010 in Boulder, Colorado.

CCF Test Plan Database

For Test Plan Database access follow this link...

<https://testplan.globalccfcert.org>

For information on Getting Started...

How to logon to the CCF Test Plan Database for the first time.

The screenshot shows the 'Welcome to InterLab® (Version 2.6 PS)' login page. It prompts the user to enter their username and password. There are input fields for 'User Name' (containing 'username') and 'Password'. Checkboxes for 'Remember User Name' and 'Remember Password' are present. Buttons for 'OK', 'Cancel', and 'Reset Password' are at the bottom.

1. Enter "User Name" (typically first initial and last name)
2. Click on "Reset Password".
3. Your Password will be sent to your e-mail address
4. Receive your "Password" by e-mail
5. When you are ready to access the CCF Test Plan Database click on the link below:

<<https://testplan.globalccfcert.org>>

If you have trouble with your logon please e-mail info@globalccf.org
I need a CCF Test Plan Database user name and password.

Creating a test plan...

The process of test plan creation involves working within the CCF TPDB to create a TPDB *Project* for the device to be certified. A DDT will be created for this device. A test plan may be generated based on this DDT. This test plan may be exported. The steps involved with creating a test plan are described in the CCF TPDB User Guide. The steps needed to obtain the CCF TPDB User Guide are described in the CCF Test Plan version 11.0.0 Appendix A.

Exporting a file that resembles the former Excel Appendix A...

Warning: All exported copies of the test plan test cases are uncontrolled.

For purpose of examining the complete CCF Test Plan including Test Platform validation information for each test case, it is possible to export an Excel spreadsheet in an Excel format similar to that of the Appendix A Excel spreadsheet released within CCF Test Plan version 10.1.0.

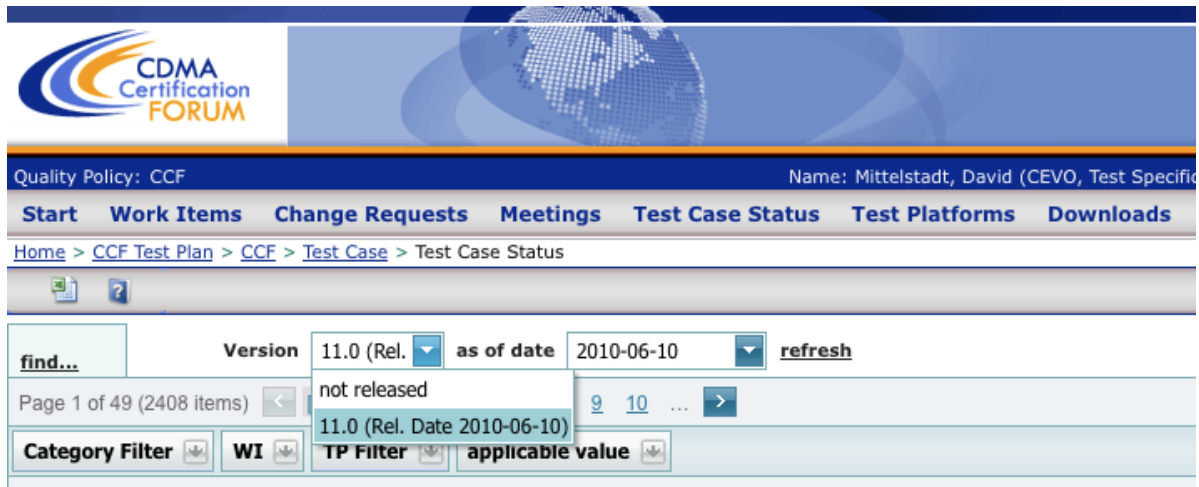

From the CCF TPDB home page click the *Test Plan Maintenance* button...

From the CCF Test Plan Maintenance page click the *Test Case Status* button...

Export of the Test Plan displayed on this page may be accomplished through click selection of the Excel export button – . Ensure the desired CCF Test Plan Version is selected prior to export. **Version [11.0 (Rel. Date 2010-06-10)]**

The screenshot shows the CDMA Certification Forum website interface. At the top left is the CDMA Certification Forum logo. Below it, the text "Quality Policy: CCF" and "Name: Mittelstadt, David (CEVO, Test Specific)" is visible. A navigation menu includes "Start", "Work Items", "Change Requests", "Meetings", "Test Case Status", "Test Platforms", and "Downloads". The breadcrumb trail reads "Home > CCF Test Plan > CCF > Test Case > Test Case Status". Below the breadcrumb is a search bar with a "find..." label and a "refresh" button. The search criteria are "Version" set to "11.0 (Rel. Date 2010-06-10)" and "as of date" set to "2010-06-10". A dropdown menu is open under "Version", showing "not released" and "11.0 (Rel. Date 2010-06-10)". Below the search bar, it says "Page 1 of 49 (2408 items)". At the bottom, there are filter buttons for "Category Filter", "WI", "TP Filter", and "applicable value".
